CMD ASSOC ZFSENDTOTARGET CLSID

They ask you to open a command prompt, "Windows + R" again, then type CMD, then in the command prompt type ASSOC. This lists a load of programs and stuff, and at the bottom there will be something that looks like this:

```
C:\Windows\system32\cmd.exe
.\xsl=xslfile
.\xslt=xsltfile
.\xsn=InfoPath.Solution.2
.\xst=PSTFile
.\xtp=XTPFile
.\xxe=WinRAR
.\z=WinRAR
.\zfsendtotarget=CLSID\{888DCA60-FC00-11CF-8F0F-00C04FD7D062}
.\zip=WinRAR.ZIP
.\zxp=Adobe.Extension.Package.ZipFormat
C:\Users\jbourque>p
```

They will then direct you to Computer > Manage > Computer Management > System Tools > Event View > Windows Logs. It showed a list of events, with errors and warnings. They will ask you how many errors there were. I said about 20. This is not really important.

This is a COMPLETE SCAM.
